

MINGZE WANG

210, Jingyuan Building #6, [Peking University](#), Beijing, China, 100084

mingzewang@stu.pku.edu.cn

SHORT BIO

I am a fourth-year Ph.D candidate in Computational Mathematics, Peking University. I am very fortunate to be advised by [Prof. Weinan E](#). Prior to that, I received my B.S. degree in Pure and Applied Mathematics (ranking 1/111 for the first three years during my undergraduate study) from Zhejiang University in 2021. My homepage is <https://wmz9.github.io/>.

EDUCATION

Peking University

Ph.D Candidate, *Computational Mathematics*

School of Mathematical Sciences

Advisor: Prof. Weinan E.

Beijing, China

2021.09 - Present

Zhejiang University

Bachelor of Science, *Pure and Applied Mathematics*

School of Mathematical Sciences

Academic ranking: 1/111, Comprehensive ranking: 1/111, Major GPA: 4.84/5 (95.5/100).

Hangzhou, China

2017.09 - 2021.06

RESEARCH INTERESTS

I am broadly interested in theory, algorithm and application of machine learning. I am also interested in non-convex and convex optimization. Recently, I am also dedicated to use theory to design algorithms elegantly. Specifically, my recent research topics are

- **Deep learning theory**: theory and theory-inspired algorithm [1][2][3][4][5][6][8][9][10][11][12][13]
 - **Expressivity**: Explore the expressive power of Transformers through the lens of approximation theory [9][12]; the expressivity of state-space models.
 - **Optimization**: Why can optimization algorithms converge to global minima when training neural networks [2][4][12]?
 - **Implicit Bias**: Why can optimization algorithms converge to global minima with favorable generalization ability when training neural networks? Flat-minima-bias [3][5][9][10][11]; max-margin-bias aspects [4][6].
 - **Generalization**: How to measure the generalization ability of neural networks [1].
 - **Algorithm Design**: For machine learning problems, design new optimization algorithms which can (i) converge faster [10][13]; (ii) generalize better [6][10].
- **Transformer and Large Language Models**: theory and algorithm. [8][10][12][13]
 - **Expressivity**: The expressive power and mechanisms of Transformer [8][12]; the mechanisms of in-context learning [12]; the expressivity of state-space models.
 - **Algorithm Design**: Design faster optimizers for training LLMs [10][13]; design more efficient model architectures; design more efficient strategy for data selection.
- **Non-convex and Convex Optimization**: theory and algorithm. [2][4][6][10][11][12][13]
 - **Convex Optimization in ML**. [6]
 - **Non-convex Optimization in ML**. [2][4][10][11][12][13]
 - **Algorithm Design**: Design faster optimizers for training neural networks [10][13]; accelerate the convergence for the problems with specific structure [6].

- **Computer vision and Natural language processing:** algorithm and application [7][10][13].

Now, I am supported by the **Young Scientists (Ph.D) Fund of the National Natural Science Foundation of China (¥300,000)** (“Analyzing and Improving the Adam Optimizer for Foundation Model Training”).

	Optimization & training dynamics	Generalization & implicit bias	Expressivity & approximation power
Theory	<ul style="list-style-type: none"> • fully-connected networks work [2][4] • transformer models work [12] 	<ul style="list-style-type: none"> • flatness bias work [3][5][9][10][11] • margin bias work [4][6] 	<ul style="list-style-type: none"> • transformer models work [8][12] • state-space models work [14]
Algorithm	<ul style="list-style-type: none"> • faster convergence work [10][13] 	<ul style="list-style-type: none"> • better generalization work [6][10] 	<ul style="list-style-type: none"> • more efficient models work [15][16]

- Works [1]~[13] have been published or preprinted.
- Works [14]~[16] are on the preparation.

SELECTED AWARDS & HONOURS

Young Scientists (Ph.D) Fund of the National Natural Science Foundation of China (300,000 RMB). 2024.12
National Scholarship (top 0.2% in the nation; 30,000 RMB), The Ministry of Education. 2024.09
Principal Scholarship (70,000 RMB), Peking University. 2024.05
BICMR Mathematical Award for Graduate Students (top 1%; 110,000 RMB), Peking University. 2023.11
Schlumberge Scholarship (30,000 RMB) , Peking University. 2022.10
PKU Academic Innovation Award (top 1%), Peking University. 2022.10
Outstanding Graduate of Zhejiang Province (top 5%); **Outstanding Graduate of ZJU** 2021.05
National Scholarship (top 0.2% in the nation) 2019.10
First Class Scholarship of ZJU (top 3%) 2019, 2020.10
Zhejiang Provincial Government Scholarship 2018.10
First Prize of Mathematical Contest in Modeling of ZJU (top 1%) 2020.06
Meritourious Award in The Mathematical Contest in Modeling 2020.02
National Second Prize of Chinese Undergraduate Mathematical Contest in Modeling (top 2.5%) 2019.10

TEACHING

Peking University Beijing, China
 Teaching assistant: Deep Learning Theory, taught by **Prof. Zhiyuan Li** (TTIC) Summer School 2023.
 Teaching assistant: Calculus (A) Fall 2021
 Teaching assistant: Calculus (B) Fall 2022, 2023, 2024; Spring 2022, 2023, 2024

EXPERIENCE

Meituan, LLM group Beijing, China
 Algorithm Intern 2025.01 - Present
 Work on designing efficient algorithms for pretraining large language models

Institute for Advanced Algorithms Research, LLM group Shanghai, China
 Algorithm Intern 2023.12 - 2024.08
 Work on designing faster optimizers for pretraining large language models.

Moqi Technology Beijing, China
 Algorithm Intern 2021.09 - 2022.06
