

MINGZE WANG

210, Jingyuan Building #6, **Peking University**, Beijing, China, 100084

mingzewang@stu.pku.edu.cn

SHORT BIO

I am a third-year Ph.D student in Computational Mathematics, Peking University. I am very fortunate to be advised by **Prof. Weinan E**. Prior to that, I received my B.S. degree in Pure and Applied Mathematics (ranking 1/111 for the first three years during my undergraduate study) from Zhejiang University in 2021. My homepage is <https://wmz9.github.io/>.

EDUCATION

Peking University	Beijing, China
Ph.D Candidate, <i>Computational Mathematics</i>	2021.09 - Present
School of Mathematical Sciences	
Advisor: Prof. Weinan E.	

Zhejiang University	Hangzhou, China
Bachelor of Science, <i>Pure and Applied Mathematics</i>	2017.09 - 2021.06
School of Mathematical Sciences	
Academic ranking: 1/111, Comprehensive ranking: 1/111, Major GPA: 4.84/5 (95.5/100).	

EXPERIENCE

Peking University	Beijing, China
Teaching assistant: Deep Learning Theory, taught by Prof. Zhiyuan Li	Summer School 2023.
Teaching assistant: Calculus (A)	Fall 2021
Teaching assistant: Calculus (B)	Fall 2022, 2023; Spring 2022, 2023, 2024

Institute for Advanced Algorithms Research	Shanghai, China
Algorithm Intern	2023.12 - now
Work on designing faster optimizers for pretraining large language models.	

Moqi Technology	Beijing, China
Algorithm Intern	2021.09 - 2022.06

RESEARCH INTERESTS

I am broadly interested in theory, algorithm and application of machine learning. I am also interested in non-convex and convex optimization. Recently, I am also dedicated to use theory to design algorithms elegantly. Specifically, my recent research topics are

- **Deep learning theory:** optimization, generalization, implicit bias, and approximation. [1][2][3][4][5][6][7][8][10][11]
 - **Optimization:** When training neural networks, why can optimization algorithms converge to global minima? [1][4]
 - **Implicit Bias:** When training neural networks, why can optimization algorithms converge to global minima with favorable generalization ability (even without any explicit regularization)? Such as flat-minima-bias [2][5] and max-margin-bias aspects [4][6].
 - **Algorithm Design:** For machine learning problems, design new optimization algorithms which can converge to global minima with better generalization ability. [6] (On the preparation)
 - **Approximation:** Exploring the expressive power of deep neural networks through the lens of approximation theory. [7]
 - **Generalization:** How to measure the generalization ability of neural networks. [3]
- **Foundation Model and Transformer:** theory and algorithm. [7][10][11]

- **Expressive Power:** The expressive power and mechanisms of Transformer [7]; the theory of in-context learning [11]
- **Algorithm Design:** Designing faster optimizers for pretraining LLMs. [10]
- **Non-convex and Convex Optimization:** theory and algorithm. [1][4][6][10]
 - **Convex Optimization in ML.** [6]
 - **Non-convex Optimization in ML.** [1][4][10]
 - **Algorithm Design:** For deep neural networks, design new optimization algorithms to achieve faster training. [10]
- **CV and NLP:** algorithm and application [9][10].

SERVICE

Conference: Conference on Neural Information Processing Systems (NeurIPS); International Conference on Learning Representations (ICLR).

Journal: Journal of Machine Learning Research (JMLR); Journal of Machine Learning (JML).

SELECTED AWARDS & HONOURS

Principal Scholarship, Peking University.	2024.05
BICMR Mathematical Award for Graduate Students (top 1%, 110,000 RMB), Peking University.	2023.11
Schlumberge Scholarship (30,000 RMB) , Peking University.	2022.10
PKU Academic Innovation Award (top 1%), Peking University.	2022.10
Outstanding Graduate of Zhejiang Province (top 5%)	2021.05
Outstanding Graduate of ZJU	2021.05
Chinese National Scholarship (top 1%)	2019.10
First Class Scholarship of ZJU (top 3%)	2019, 2020.10
Zhejiang Provincial Government Scholarship	2018.10
First Prize of Mathematical Contest in Modeling of ZJU (top 1%)	2020.06
Meritourious Award in The Mathematical Contest in Modeling	2020.02
National Second Prize of Chinese Undergraduate Mathematical Contest in Modeling (top 2.5%)	2019.10

SELECTED UNDERGRADUATE TRANSCRIPT

Real Analysis	100	Functional Analysis	100	Partial Differential Equation	100
Scientific Computing	100	Mathematical Analysis (II)	99	Differential Geometry	99
Point Topology	99	Mathematical Physics	97	Complex Analysis	97
Calculus (I)	97	Stochastic Process	96	Foundation of Analysis	96
